Board Member Conflict of Interest

Board members believe that the Board of Directors membership is an act of public service and as such the individual members expect no monetary reward. Further, the Board strives to avoid any impropriety or appearance of impropriety in its use of school funds. In accordance with statute, the Board will not purchase supplies, equipment or personal services from a firm or corporation in whom a Board member has a significant interest unless such purchases are made on the basis of open competition bids or quotations. Art. IV Section 10 and 11

Before taking office, all Board members will sign and agree to abide by a Board approved conflict of interest statement.
